13) The Additional Director, Mr. Abdul Khader, was consulted regarding the distribution of work proposed in my letter dated the 19th December 1946. He is in agreement with the proposals made therein. This distribution of work is already in force in the office since December last as reported in my letter.

2. Two slight further modifications are proposed as follows:-

(a) Since urban rationing is with the Director, he will naturally have to be the Chairman of the Bangalore City Food Council.

(b) It is proposed that the Additional Director (Transport) may be in charge of motor transport as well as railway transport, as both are closely connected, and as he has special qualifications and facilities for dealing with the subjects.

3. As regards general questions of policy and matters affecting Control Orders, both the Additional Directors agree that this responsibility should rest with the Director so far as this office is concerned. The final decision in such matters will, of course, rest with the Government.

4. A statement showing the allocation as finally proposed is enclosed for favour of kind approval.

SIR,

Subject: WORK DISTRIBUTION.

With reference to your letter No.SD.2154/A.30-46-2 dated the 2nd September 1946 approving the distribution of work as between the Director and the Additional Director, I have the honour to state that experience has shown that the present distribution is very unequal and somewhat anomalous. Many of the items included in the Director's list e.g., No.6, Popularisation of new grains, and No.7, Storage accommodation involve very little work at present; and two items viz., No.5, Conferences and Committees and No.8, Representative Assembly and Legislative Council are occasional in nature and do not necessitate continuous attention. On the other hand, even a single item compendiously termed "Controlled commodities" in the Additional Director's list involves numerous items like groundnuts, potatoes, onions, tamarind, oil seeds etc., each important enough to form a subject by itself, and involving much work and complicated questions of control.

2. Apart from this, it is seen that subjects which are integrally connected have been split up as between the Director and the Additional Director. Thus, the distribution of foodgrains irrespective of area is a natural unit, and the present divorce between statutory and non-statutory areas leads to lack of co-ordination, inasmuch as the question of supplies, offtakes etc., for both these areas are closely bound up with each other and need to be dealt with by a single Officer.

Similarly, all foreign quotas form together a single item involving identical problems, and the separation of the import of pulses from other foreign quotas is found to be very inconvenient in practice. The distribution of pulses is also linked up with that of other grains. In general it is very desirable that questions of obtaining and distributing supplies should be combined in one hand.

3. Finally, one most important item does not find specific mention in the present list and that is; General policy of the Department as a whole, including the introduction or amendment of Control Orders. It is essential that this should be included in the list in order to provide for much-needed cohesion and uniformity. This will, of course, constitute the Director's prime responsibility. I am therefore effecting a slight readjustment of work in my office as in the enclosed statements, in order to rectify the anomalies, and afford relief to the Additional Director as well as provide adequate work for myself. I request that my action may be got formally approved by Government. The Additional Director is agreeable to the proposal.

I have the honour to be,
S i r,
Your most obedient servant,
